(malation/diazinon/glyphosate/tetrachlorvinphos/parathion)

FYI – for those with an interest, the attached is the recently released IARC summary report on findings for malathion/diazinon/ glyphosate/ tetrachlorvinphos/parathion.

The WHO/IARC graphic below shows how the 2A (malathion, diazinon, and glyphosate) and 2B (tetrachlorvinphos and parathion) group classifications were derived based on the animal and human epi results reviewed by the IARC Panel.

| | | EVIDENCE IN EXPERIMENTAL ANIMALS | | |
|--------------------|-------------------|--|--|-------------------|
| | | <i>Sufficient</i> | <i>Limited</i> | <i>Inadequate</i> |
| EVIDENCE IN HUMANS | <i>Sufficient</i> | Group 1 (<i>carcinogenic to humans</i>) | | |
| | <i>Limited</i> | Group 2A (<i>probably carcinogenic</i>) | Group 2B (<i>possibly carcinogenic</i>) (exceptionally, Group 2A) | |
| | <i>Inadequate</i> | Group 2B (<i>possibly carcinogenic</i>) | Group 3 (<i>not classifiable</i>) | |

David

Thanks, Carol.

I've attached the downloaded PDF of the article to make it simpler for folks.

David.

Hi All

I just learned that the summary of the IARC-pesticide meeting is expected to be available on line around 1 pm today. FYI.

I think this is the link: <http://www.thelancet.com/journals/lanonc/issue/current>.

Carol
